

Komponentum Flex air DN75

antistatic and antibacterial duct

Product code: K1FLEX75

Flexible ducts are one of the main elements of the mechanical ventilation system. They are used to distribute air inside the building and therefore they make a significant contribution to ensure healthy and comfortable indoor conditions.

Technical specifications:

Product name	External diameter	Internal diameter	Quantity in roll	Air permeability (at 3m/s air flow)
Komponentum Flex air DN75 antistatic and antibacterial duct	75 mm	63 mm	50 m	33 m ³ /h
